ethiopia s model for delivering basic services appears to be succeeding and to confirm that services improve when service providers are more accountable to citizens as discussed in the world development report 2004 accountability for delivering basic

services can take an indirect long route in which citizens influence service providers through government or a more direct short route between service providers and citizens when the long indirect route of accountability is ineffective service delivery can suffer especially among poor or marginalized citizens who find it challenging to express their views to policymakers in Ethiopia the indirect route of accountability works well precisely because of decentralization service providers are strictly accountable to local governments for producing results but in turn the local authorities are held accountable by the regional and federal governments a degree of local competition for power and influence helps to induce local authorities and service providers to remain open to feedback from citizens and take responsibility for results the direct route of accountability has been reinforced by measures to strengthen financial transparency and accountability educating citizens on local budgets and publicly providing information on budgets and service delivery goals social accountability improving citizens opportunities to provide feedback directly to local administrators and service providers and impartial procedures to redress grievances woreda level district spending has been a very effective strategy for Ethiopia to attain its millennium development goals mdgs woreda health and education goes to pay for health extension workers hews and teachers this study finds evidence that woreda level spending in health and education is effective owing to the intervention of hews the use of health services has increased especially among the poorest quintiles finally the effect of woreda level spending on agricultural extension workers is associated with higher yields for major crops spending on agricultural extension workers increases the probability that farmers regardless of the size of their plots will use improved farming techniques education health and agriculture account for 97 percent of woreda spending this is complemented by support for capacity building and citizen voice clearly spending efficiency is improved through better capacity more transparency and greater accountability to citizens

the role of integration as a catalyst for economic growth development and insulation from global shocks has made the concept of regional integration even more attractive to states this book contains compelling arguments and empirical observations that detail some of the key opportunities governments in Africa are pursuing

the popular uprisings in 2011 that overthrew Arab dictators were also a rebuke to crony capitalism diverted against both rulers and their allied businessmen who monopolize all economic opportunities while the Middle East has witnessed a growing nexus between business and politics in the wake of liberalization little is discussed about the nature of business cronies the sectors in which they operate the mechanisms used to favour them and the possible impact of such crony relations on the region

development combining inputs from leading scholars in the field crony capitalism in the middle east business and politics from liberalization to the arab spring presents a wealth of empirical evidence on the form and function of this aspect of the region crony capitalism in the middle east is unique in both its empirical focus and comparative scale analysis in individual chapters is empirically grounded and based on fine grained data on the business activities of politically connected actors furnishing for the first time information on the presence numerical strength and activities of politically connected entrepreneurs it also substantially enhances our understanding of the mechanisms used to privilege connected businesses and their possible impact on undermining the growth of firms in the region it offers a major advance on our prior knowledge of middle eastern political economy and constitutes a distinct contribution to the global literature on crony capitalism and the politics of development the book will be an essential resource for students researchers and policymakers alike
