this book is an edited collection that explores the fundamental concepts of real time simulation hardware in the loop testing using typhoon hil for complex electrical systems typhoon hil has recently emerged as a powerful tool in the rapidly growing field of ultra high fidelity controller hardware in the loop c hil simulations for power electronics microgrids and distribution networks the book integrates the coverage of underlying theory and acclaimed methodological approaches and high value applications of real time simulation and hardware in the loop testing all from the perspectives of eminent researchers around the

globe utilizing typhoon hil this book serves as a valuable resource for engineers academicians researchers experienced professionals and research scholars engaged in becoming familiarized with the real time simulation of complex electrical systems using typhoon hil with a specific focus on hardware in the loop testing

this book offers a systematic overview of the concepts and practical techniques that readers need to get the most out of their large scale data mining projects and research studies it guides them through the data analytical thinking essential to extract useful information and obtain commercial value from the data presenting the outcomes of international conference on soft computing and data mining scdm 2017 held in johor malaysia on february 6 8 2018 it provides a well balanced integration of soft computing and data mining techniques the two constituents are brought together in various combinations of applications and practices to thrive in these data driven ecosystems researchers engineers data analysts practitioners and managers must understand the design choice and options of soft computing and data mining techniques and as such this book is a valuable resource helping readers solve complex benchmark problems and better appreciate the concepts tools and techniques employed

most validated questionnaires that are widely used around the world are created in a non native language if such a questionnaire is to be used in a native speaking population it must first be validated this book aims to be a useful guide for describing all the steps required for validating a questionnaire this book also provided a standard checklist with 17 items that are recommended to serve as a useful guide for researchers conducting questionnaire validation research

this book includes original peer reviewed research papers from the icaeus 2021 which offers a unique and interesting platform for scientists engineers and practitioners throughout the world to present and share their most recent research and innovative ideas the aim of the icaeus 2021 is to stimulate researchers active in the areas pertinent to intelligent unmanned systems the topics covered include but are not limited to unmanned aerial ground surface underwater systems robotic autonomous control navigation and positioning architecture energy and task planning and effectiveness evaluation technologies artificial intelligence algorithm bionic technology and its application in unmanned systems the papers showcased here share the latest findings on unmanned systems robotics automation intelligent systems control systems integrated networks modeling and simulation it makes the book a valuable asset for researchers engineers and university students alike

this book presents real world problems and exploratory research in computational statistics mathematical modeling artificial intelligence and software engineering in the context of the intelligent systems this book constitutes the refereed proceedings of the 3rd computational methods in systems and software 2019 comesyso 2019 a groundbreaking online conference that provides an international forum for discussing the latest high quality research results

insects are the most interesting and diverse group of organisms on earth many of which are useful as pollinators of crops and wild plants while others are useful as natural enemies keeping pestiferous insects in check it is important to conserve these insects for our survival and for this the diversity of insect species inhabiting the different ecosystems of our country must be known the cornerstone to

studies of any kind of organismal diversity is their taxonomic identity even after over two and half centuries of studies so little is known of the insect wealth of our country it has contributions from taxonomists who have been studying indian insects for long this book offers up to date information on many important groups of indian insects seeking to fill the lacuna of a long felt need for a comprehensive work on the taxonomy of indian insects salient features provides an up to date taxonomy of major insect groups of india presents identification keys with illustrations of several important groups of indian insects gives a new insight into why insects are so abundant addresses fundamental questions in mechanoreception and cross kingdom interactions using insects as model systems indian insects diversity and science is a festschrift to professor c a viraktamath an insect taxonomist par excellence it has been designed to cater to the needs of academicians researchers and students who wish to identify insects collected from local environments and will be an invaluable aid for those working in the areas of systematics ecology behaviour diversity and the conservation of insects

in research a questionnaire is an important instrument for collecting data the quality of the questionnaire has an impact on data collecting success and ultimately on the study s objectives s the overall approach to developing four types of questionnaires for quantitative research is discussed in this book a questionnaires for capturing facts or information b questionnaires for evaluating knowledge c questionnaires for measuring latent variables and d questionnaires for screening or diagnosing a subject this book is intended to be a quick reference for researchers who need to create a high quality questionnaire for their survey research
